

Shutter Panel Specifications:

- Panel Depth: 7/8"
- Side Stile (A): 1" - 4"
- Divider Rail (B): 2" - 3"
- Shaker (B): 2" - 3"
- Bottom Rail (C): 3" - 4"
- Raised Panel (D): Determined by panel height
- Louvers (E): 7/8" (18° angle)
- Shaker Spaces (F): Approximately 3/8"

Louver Shutter Profile:

Select from two available configurations.

Constructed from durable vinyl, fully assembled, and ready for installation. Standard panels are made with open louvers and stapled multi-piece components. Combo arch top shutter panels are made with an open back. Shakers (B) are at a vertical 0° angle (front facing) with open shakers. All shutters have an authentic wood grain appearance and beaded detail. Sold in pairs with one right and one left panel. Combo shutters are available in one color or a combination of two colors.

Available Sizes:

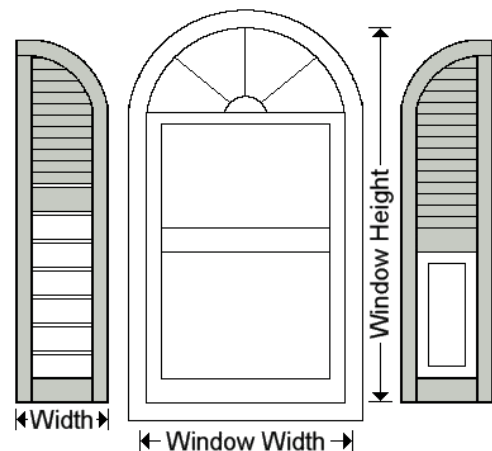

Heights in 1/4 inch increments.

Panel Width	Available Heights	Suggested for Window Widths
14"	30" - 92"	25" - 60"

Measure:

Width: Shutter width depends on the space available around a window, as well as desired appearance. For an appearance of functioning shutters, shutter width should be about half the width of the window (not including the frame).

Height: Measure the height of each window or door (sash) and order the shutters in the same heights (do not include the frame of the window or door in your measurements).
